Contents

<i>Foreword by Ian Donald MacLeod</i>	vii	Green rusts	59
<i>Preface</i>	ix	Green rust on cast iron	61
<i>Acknowledgements</i>	xi	Ferrous hydroxychloride	61
Chapter 1 Iron and steel: an introduction	1	Chapter 5 Iron sulphides and sulphates	63
Extraction of iron	1	Origin of the iron sulphides	65
Alloying elements	2	Chalcopyrite	66
Constituents of iron and steels	3	Pyrite disease	67
Constituents of cast iron	10	Iron sulphates	69
Iron and iron alloys	12	Jarosites	71
Early steel	19	Iron arsenates	71
Damascening and pattern welding	21	Chapter 6 Iron phosphates	73
Making cast iron	25	Vivianite	73
Iron dowels in structures and buildings	25	Phosphates as corrosion inhibitors	79
Making iron plate	26	Chapter 7 Iron silicates	81
Patination, coloration and surface finish of iron	26	Green earths	81
Chapter 2 Iron oxides and hydroxides	35	Aerinite	82
Goethite	35	Iron slag constituents	83
Lepidocrocite	37	Chapter 8 Iron carboxylates and cyanides	87
Akaganéite and schwertmannite	37	Iron gall inks	88
Feroxyhyte	39	Prussian blue	92
Ferrihydrite	39	Iron salts in historic photographic processes: cyanotypes	93
Bernalite	39	Chapter 9 Iron corrosion in the soil	95
Haematite	39	Deterioration in the soil	96
Oxide-coated pottery	46	Corrosion product determination in burial environments	96
Magnetite	47	Understanding the corrosion process	98
Maghemite	49	Sulphate-reducing bacteria	102
Wüstite	49	Degradation of wood and other organic materials	104
Use of ilmenite	50	Petrification and replacement of organic material in burial environments	104
Use of iron zinc oxide	50	Chapter 10 Iron corrosion in the atmosphere	107
Occurrence of iron oxides in blackened stone crusts	50	Rate of atmospheric rusting	109
An introduction to Potential-pH diagrams	50	Modelling atmospheric corrosion	109
Chapter 3 Iron carbonates	53		
Chapter 4 Iron chlorides	57		
Ferrous and ferric chloride	57		
Iron oxychloride	58		

Atmospheric corrosion and sulphates	116	Chapter 14 Conservation of exposed ironwork	145
Atmospheric corrosion and chlorides	116	Inorganic coatings for iron	145
Other atmospheric corrosion factors	117	Organic coatings for iron	146
Effects of copper and other alloying elements	117	Comparative studies of modern organic coatings	147
Corrosion of weathering steels	117	Restoration of the Statue of Liberty	148
Deterioration of historic iron structures	121	Preservation of the <i>SS Great Britain</i>	149
The iron pillar of New Delhi	121	Historic iron railings, fences and building components	149
Iron corrosion in cement and concrete structures	121	Conservation of painted iron surfaces	151
Chapter 11 Iron corrosion in freshwater and marine environments	123	Corrosion inhibitors	151
Chapter 12 Introduction to the conservation of iron objects	127	The behaviour of cast iron during a fire	153
Morphological states	128	Iron staining and associated deterioration	153
Surface appearance	128	Chapter 15 Conservation of iron from marine sites	155
Methods of protection	130	Electrochemistry and electrolytic reduction	155
Chapter 13 Conservation of iron from the soil	131	Iron and polyethylene glycol (PEG)	157
Historical and early conservation treatments	131	Reconstruction of the form of totally corroded iron objects	158
Early impregnation techniques	132	Submarines	158
Examination techniques	132	On-site packing	159
Mechanical and chemical cleaning	134	<i>In-situ</i> monitoring	159
Techniques based on reduction and heating	135	Chapter 16 Conservation and decision-making	161
Techniques based on aqueous extraction	138	Assessing the efficacy of treatment	161
Measuring chloride ion concentration	141	<i>Glossary of some technical terms and descriptions</i>	163
Composite iron objects	141	<i>Bibliography</i>	167
Storage strategies	142	<i>Index</i>	191
